About me

I am a Consultant in Obstetrics and Gynecology with extensive experience in patient care, teaching, and research. I have worked in various healthcare settings, including university hospitals and general hospitals. My passion lies in advancing women's health, especially in reproductive health and high-risk obstetrics. I am dedicated to providing the highest standard of care to my patients while contributing to the development of medical education and research. With strong experience in both clinical and academic environments, I aim to inspire and mentor the next generation of healthcare professionals.

Education

- **Diploma in Human Reproduction and ART**
